

# SASKATCHEWAN SCRAP TIRE CORPORATION

When the Saskatchewan Scrap Tire Corporation (SSTC) and its tire recycling program were established in 1996, it was clear that a decades-old problem couldn't be cleaned up overnight. As a result, a three-phased approach was developed to tackle the scrap tire issue.

## Phase 1: Current Generation Tires

- When retailers install new tires on consumers' vehicles, the used tires removed from the vehicles are kept on-site by the retailers, picked up by collectors, and transported directly to processing facilities for recycling.

## Phase 2: Landfill Clean-Up

- This involved the clean-up and recycling of tire stockpiles built up over several decades in city, town, village, and rural municipal landfills throughout Saskatchewan.

## Phase 3: Private Stockpiles

- This will involve the clean-up and recycling of tire stockpiles found on private properties throughout Saskatchewan.
  - There will be no cost to the individual for the phase 3 pickups.
  - One time program
  - Includes tires on farmland, residential land and First Nation Land

The SSTC is now implementing Phase 3 and we would like to include the Auto Recyclers in this program. We will be conducting a **ONE TIME FREE CLEAN UP OF SCRAP TIRES** in your area. To be included in the clean up we ask that register your tire site –

**Please complete the back of this form and fax it in to SSTC**
