

CITY OF MOOSE JAW

SOLID WASTE MANAGEMENT FACILITY

PUBLIC OPEN HOUSE

The Moose Jaw Sanitary Landfill is expected to reach its maximum capacity within the next four to five years. To continue to serve the City and surrounding region, planning has begun to develop a new Solid Waste Management (SWM) Facility.

The location of the proposed SWM Facility is NW-20-17-26-2, SW-20-17-26-2, and NE-20-17-26-2 within the RM of Moose Jaw.

The SWM Facility will collect, process, and store municipal solid waste generated within Moose Jaw and the surrounding area. The SWM Facility will include the following components:

- Environmental compliance features such as leachate, stormwater, and landfill gas management
- Scale and scale house
- Public drop off area for household waste and recycling
- Landfill
- Concrete and asphalt management
- Wood waste management
- Composting

A public open house will be hosted by the City of Moose Jaw. This event offers the public an opportunity to view the key components of the proposed plan and to provide their perspectives and comments before the RM of Moose Jaw Council considers the application.

The open house will be a come-and-go event and consist of a series of display boards about the SWM Facility. City Administration, the Ministry of Environment, and consultants from GHD and Associated Engineering will be present to answer questions regarding the proposed development.

DATE:
Thursday, February 22, 2024

TIME:
1:30 – 3:30 pm
6:00 – 8:00 pm

LOCATION:
Moose Jaw Events Centre
110 1st Avenue North West
