

Strychnine Stewardship Training Program

The RM of Moose Jaw NO. 161 has been registered for the sale of Strychnine for the control of Richardson's ground squirrels (gophers). **Strychnine can only be used on agricultural land and cannot be used in residential or public areas or any other areas that may be open to the public.**

Mandatory training is a requirement to all users of the product. Proof of training completion is required before strychnine can be purchased. Ensure you select the RM office (RM 161 Moose Jaw) where you plan to pick up your strychnine. This will ensure that the RM receives your records and can validate that you have completed your training. Training must be completed every year strychnine is used. Below are 2 QR Codes to access the Registration process and the Training Site:

Registration Process

Training site

While there has not been a date provided regarding the availability of the product, the RM will update ratepayers once more details are provided. More information can be found at the SARM website: <https://sarm.ca/strychnine-stewardship-training/>. Please contact the RM 161 office at 306-692-3446, should you have any questions.
